

MANAGED ENDPOINT DETECTION & RESPONSE (EDR)

Engage a Security Operations Center (SOC) in your cybersecurity strategy.

DES cybersecurity agents use SentinelOne EDR for best-in-class endpoint protection. In the battle against ever-evolving cyber threats, a sophisticated managed solution empowers modern enterprises to defend faster, at greater scale, and with higher accuracy.

PROTECT EVERY SINGLE ENDPOINT & WORKLOAD

No matter the location or connectivity, every laptop, PC and server on the platform is equipped to autonomously detect, prevent and recover from threats in real time.

UNPARALLELED VISIBILITY WITH DISTRIBUTED AI

The EDR management console provides analysts of all skill levels an easier way to understand root cause analysis. Rich AI models deploy enterprise-grade automation to reduce manual investigation.

INDUSTRY-RECOGNIZED THREAT PREVENTION

SentinelOne EDR tops the 2021 MITRE Engenuity ATT&CK evaluation and is a leader in Gartner's Magic Quadrant for Endpoint Protection Platforms.

24/7/365 SECURITY OPERATIONS CENTER

From vulnerability management to active threat hunting and remediation, our cyber security experts are on the frontline of incident response.

- *Business can't afford to be offline.*
- *In-house IT has limited resources.*
- *Cybercrime costs \$6.9bn annually.*

- *Act fast & eliminate vulnerabilities.*
- *Lower insurance premiums.*
- *Stay ahead of the risk.*
