

It all starts with a web of wires. It's the network

infrastructure...

...which transforms the building and its rooms into

smart spaces.

24/7, people, property and places are secured with

unified security...

...while the network is protected with advanced

cybersecurity.

Cloud and premise solutions optimize daily business

operations...

...while the future is created with data analysis and

automation.

DES Networking Solutions

- Structured Cabling
- Fiber Optics
- Network Architecture
- Wi-Fi Design
- Network Management
- Managed Services

DES Smart Spaces Solutions

- Smart Lighting
- Sensors & Triggers
- Touchless controls
- Asset Tracking
- Wayfinding
- Building System Interoperability

DES Security Solutions

- Video Surveillance
- Access Control
- Intrusion Detection
- Visitor Management
- Perimeter Surveillance
- Unified Management Platform
- Mass Notifications

DES Cybersecurity Solutions

- Firewalls
- Perimeter Defense
- Insider Threat Defense
- Application Security
- IoT Device Security
- Management Systems

DES Operational Solutions

- Cloud Integrations
- Digital Transformation
- Collaboration Solutions
- Audiovisual Solutions
- Voice Systems
- UCaaS / CPaaS
- Live Streaming
- Room Scheduling

DES AI Solutions

- User Analytics
- Machine Learning
- Smart Logistics
- Demand Planning
- Predictive Maintenance
- Customer Support Chatbots
