DES

Dagostino Electronic Services, Inc.

DES is driven to get grow facilities and dispensaries compliant, secure and operational. Every one of our clients has passed state inspection on their first round.

DES technology solutions cover security, networking, cybersecurity, voice, audiovisual and artificial intelligence.

Clients Include:

CRESCO LABS®

The Healing Center

+FARMACEUTICALRX

MAITRI

Case Study: Cresco Labs

The Challenge

Cresco Lab's Brookville grow compound covered 46,000 sq. ft. and was furnished with bulky, mobile shelving that resulted in many blind spots. Surveillance coverage was required to meet state regulations while keeping operational costs low. Additionally, Cresco desired a scalable system that would grow with its business.

The Solution

DES directly advocated with state legislators to define the standards. DES security engineers designed a 360° surveillance overlay that intelligently mapped camera positioning for greatest coverage. Cresco Labs and DES planned a phased deployment, beginning with passing state inspection. Once business was operational, DES added capacity in Cresco's new greenhouses and laboratories. An integrated management system links phones, visitor database and CCTV footage into one accessible dashboard.

The Outcome

Cresco is the leading supplier of cannabis to dispensaries across the state of Pennsylvania.
