

Unified Security & Access Control

Security is about unification: Integrating your surveillance applications onto one user-friendly platform. We partner with you at the outset to flex and scale the platform according to your security needs. Post-installation, we offer ongoing training and support so you fully understand and utilize your security capabilities.

Detection + Surveillance

We optimize the right cameras for your space and put them to work for you. Precisely calibrated, gain 360° visibility from your security dashboard.

- Perimeter Control + Intrusion Detection
- Real-Time Video Surveillance
- Sensors, Triggers and Radar Tracking
- License Plate Recognition

Access Control

Easily allow or deny access to any part of your facility. We offer a full suite of access solutions including biometrics, mobile and Bluetooth.

- Personnel Badging
- Remote Door Access
- Electronic Visitor Management
- Real-time Background Checks

Emergency Procedures

Mission control can trigger precise operating procedures in an emergency situation. Completely customizable, you can plan for the unplannable..

- Automatic Door Lockdown
- Mass Notifications
- Law Enforcement Coordination

Analytics + Smart Integrations

Extend security into operations. Your networked security system can be integrated into a range of AI building solutions.

- People Counting + Asset Tracking
- Anomalous Behavior Alerts
- Building Automation + Space Optimization

WESTMORELAND COUNTY

A COUNTY-WIDE UPGRADE

An expansive security upgrade, spanning the county jail, juvenile detention center, forensic facility and nursing home, DES installed over 2,000 IP cameras, 160 door access readers, and provided access cards to all county employees. Both the video management system and access control are controlled through a unified security platform. The single pane of glass dashboard coordinates rapid and effective security management across multiple county departments.

UPPER ST CLAIR SCHOOL DISTRICT

UNIFIED & CUSTOMIZEABLE SECURITY

With three elementary schools, two middle schools, a high school, and administrative buildings, Upper St. Clair School District required a unified security system to keep its district safe. DES designed and installed a network of over 240 IP cameras. All footage can be instantly viewed, clipped and saved through an enterprise video management system. Accessibility is paramount with access available on desktop or mobile to school administrators, security operators and the township's first responders.
